

For greater security.
For increased reliability.
For enhanced efficiency.

TOUGHPAD

Real-world value from an industry expert

In aviation, retail and hospitality, mobile card payments need to be faster, more efficient, more reliable and more secure than ever before, Panasonic's mobile card payment solutions deliver real-world commercial value, and improved customer service.

Incorporating the renowned ruggedness and business-ready performance of the Toughpad tablet range, our solutions provide an intelligent link between a customer's card and the vendor's receipt of payment once the transaction is complete.

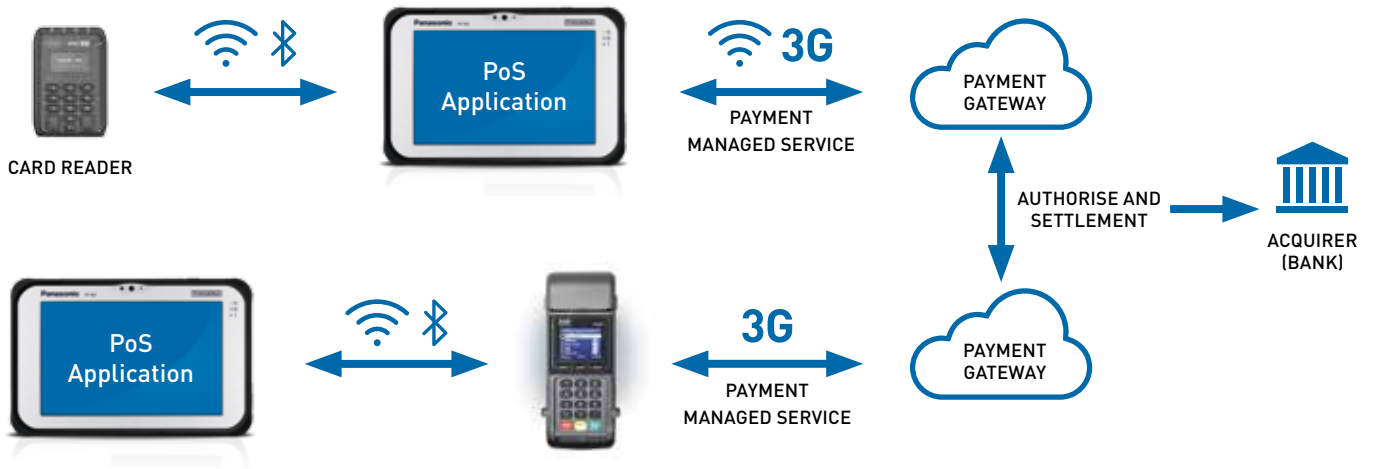

WHAT CAN PANASONIC OFFER YOU?

- Card Payments-as-a-Service, with a fixed monthly processing fee, and no transaction fees (excluding Merchant Service Charges)
- Choice of wireless card payment terminals from leading vendors
- Validated and approved with Windows and Android™ Toughpad tablets
- EMV and PCI compliant card readers, with magstripe, contact and contactless payments supported
- Semi-integrated payment API available for retail and business applications
- Future-proofed payment solutions (SRED compliant, P2PE capable)
- All international credit and debit cards accepted
- Single point of contact for all card payment queries, support and assistance

As one of the world's leading providers of business technology, with a long heritage in payment solutions, Panasonic has the global reach and proven expertise to deliver precisely what your customers need. Whether it's in a fast-paced quick service restaurant, on board an international flight, in the midst of a retail store or even at the scene of a breakdown, our solutions are ready to get to work, wherever they're needed.

How the mobile PoS solution works

A cash register function or app runs on the chosen Toughpad – via Windows or Android.

Secure EMV card and PIN handling is provided by a Bluetooth-enabled card reader and/or PIN pad – the Toughpad connects via the installed payment client.

The Toughpad connects to the PoS server and payment gateway, by GPRS, 3G or WiFi.

The payment is then authorised and settled by the relevant acquirer (bank).

Panasonic's solution provides huge pan-EU options, with the ability to connect to over 100 acquirers and many payment providers.

Toughpad FZ-G1

Windows 10 Pro tablet, with lightweight body and 10.1" high-brightness screen. Can be integrated with built-for-purpose POS cradle to improve customer service and save space.

Toughpad FZ-M1

Windows 10 Pro, 7" fanless tablet with sunlight readable display – its compact dimensions and outdoor capabilities mean it's perfectly suited to many payment applications, both in-store and further afield.

Toughpad FZ-B2

7" Android™ 6.0 Marshmallow tablet with five-finger multi-touch display, long battery life and wide range of connectivity options.

Toughpad FZ-F1/FZ-N1

4.7" Windows 10 IoT Mobile Enterprise (FZ-F1) and Android™ 5.1.1 (FZ-N1) tablets offer numerous unique features including an angled rear barcode reader to protect users from repetitive strain and enhance productivity.

To take full advantage of the opportunities presented by our mobile card payment solutions, you need to ask yourself a few key questions...

Looking for a new mobile payments solution provider?

Want to change from standalone card payments to semi-integrated card payments?

Need a single point of reconciliation between payments and PoS?

Interested in integrating new card payment devices into your existing payments infrastructure?

Want to be PCI or EMV-compliant?

Prefer to be acquirer-agnostic?

Require payment support across multiple countries and territories?

If the answer's 'yes' to any of these questions, it's time to talk to Panasonic about our new mobile payment solutions.
